

FAHRUR ROZI K

Fullstack, Backend & Applied AI Engineer

Central Java, Indonesia (GMT+7) | Open to Remote / Relocation | +62 895-3801-46029 | rfahrur6045@gmail.com
LinkedIn: linkedin.com/in/fahrur-rozi-k-336b04164 | GitHub: github.com/rfahur11 | Portfolio: fr-portofolio.netlify.app

PROFESSIONAL SUMMARY

Fullstack, Backend & Applied AI Engineer with ~2.5 years of experience architecting anti-hallucination Hybrid RAG systems (DuckDB & ChromaDB), real-time MLOps/Computer Vision platforms (YOLO26 & ONNX FP16), high-throughput backend services (Go/Fiber), and enterprise ERP/POS systems (Next.js, Electron). Proven track record in resolving critical API rate-limit bottlenecks, engineering resilient asynchronous order-ingestion pipelines, and deploying edge ML models to production.

WORK EXPERIENCE

Fullstack Developer — PT Bharata International Pharmaceutical

Jan 2024 – Present | Central Java, Indonesia

- **API Rate-Limit Optimization:** Resolved critical Shopee Open API rate-limiting failures, restoring 100% order sync stability under active vendor code freeze.
- **Idempotent Ingestion Pipeline:** Engineered asynchronous order-ingestion pipeline for multi-marketplace channels with retry backoff and dead-letter queue recovery.
- **API Governance & SLA:** Established API contract standards—including request versioning, error taxonomy, and automated test gates across vendor teams.
- **Internal Financial & ERP Modules:** Built enterprise financial modules in Java & React, automating cash flow tracking and administrative efficiency.
- **Applied ML & Computer Vision Deployment:** Trained and deployed a Computer Vision model for automated skin analysis in R&D; product workflows.

IT Systems Specialist — Bantarsari Public Health Center

Jul 2022 – Oct 2022 | Central Java, Indonesia

- **Clinical Workflow Automation:** Developed an Excel VBA system boosting staff productivity by 30%.
- **Public Portal Modernization:** Modernized public health service portal increasing community engagement by 20%.

FEATURED PROJECTS

Marketplace Intelligence System (Hybrid RAG) — Lead RAG & Data Engineer (2026)

Tech Stack: Python, DuckDB (OLAP Engine), ChromaDB (Vector Store), Gradio 6.x, Google Gemini API, Pytest, Docker

Enterprise-grade Executive Assistant & Anti-Hallucination Hybrid RAG for multi-channel e-commerce intelligence (Tokopedia, Shopee, TikTok Shop, Lazada). Resolves LLM numerical hallucinations via a two-pronged architecture: Deterministic SQL via DuckDB in-memory OLAP engine with autonomous self-correction loop, and Qualitative semantic search via ChromaDB vector store. Live on Hugging Face Spaces.

VisionOps Guard – Real-Time Industrial PPE Safety & CVOps Platform — Lead Computer Vision & MLOps Architect (2026)

Tech Stack: Python, Ultralytics YOLO26, ONNX Runtime FP16, FastAPI, Streamlit, MLflow, Prometheus, Grafana, Docker, DVC, GitHub Actions CI/CD

Enterprise Computer Vision & MLOps platform automating industrial PPE compliance monitoring (hardhats, safety vests, gloves, boots) with sub-15ms inference latency using Ultralytics YOLO26 quantized to ONNX FP16 (4.96 MB model), 5-container observability stack (Prometheus, Grafana, MLflow), and automated GitHub Actions CI/CD deployment.

LarisAI – Smart POS & AI Stock Prediction Platform — Lead Architect & Developer (2026)

Tech Stack: Electron, Next.js, React, TypeScript, Go (Fiber), Python (AI/ML), MongoDB / SQL

Cross-platform Smart Point of Sale (POS) system (Web & Electron Desktop App) modernizing cashier workflows for MSMEs with integrated AI/ML stock forecasting and automated smart marketing campaign recommendations.

Enterprise Resource Planning (ERP) & Data Integration — *Fullstack Integration Engineer (2024 – 2026)*

Tech Stack: Go (Fiber), Next.js, React, Java, MongoDB, Webhooks, REST API

Internal ERP modules automating inventory management, multi-currency financial reporting, and high-throughput Webhook gateways.

EDUCATION & CREDENTIALS

- **Universitas Pendidikan Indonesia (UPI)** — B.Ed. in Educational Systems & Information Technology (2020 – 2024 | GPA: 3.58 / 4.00)
- **Bangkit Academy (Google, Tokopedia, GoTo, Traveloka)** — Machine Learning Graduate (MSIB Kemendikbud 2024 | Final Score: 85/100)
- **Binar Academy & Dicoding Academy** — Fullstack Web Development & MLOps Graduate (Kampus Merdeka Batch 4 2023 | Final Score: 87/100 - Top Graduate)

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Go (Golang), TypeScript, JavaScript, Python, Java, SQL, HTML/CSS

Frameworks & Tools: Next.js, React.js, Fiber, Electron, Node.js, Express, REST APIs, Webhooks, FastAPI, Gradio 6.x

Databases & AI/ML: MongoDB, PostgreSQL, MySQL, DuckDB, ChromaDB, Hybrid RAG, Text-to-SQL, TensorFlow, PyTorch, YOLO26, ONNX Runtime FP16, Computer Vision, MLOps, MLflow, Prometheus, Grafana, DVC, Docker, Git

Certifications: Dev Certified for Machine Learning with TensorFlow (DCML) | MikroTik MTCNA | Google IT Automation with Python | PTESOL English Certified
